

NOW AVAILABLE

In-store QR Code for SplititGo!

Splitit's new merchant branded QR code generator leads to accelerated checkout and improved conversion.

2 Enter the total amount

4 Complete the payment with Splitit

1 Scan the QR

3 Choose a payment plan

How it Works

Generate a QR code from the portal and display it in-store, enabling shoppers to:

1. Scan the code using their phone
2. Enter the total purchase amount
3. Choose a payment plan
4. Complete the payment using Splitit — no VPOS required

Make it easy for shoppers to say “YES!”

Save Time at Checkout

Once the QR code is printed, no further employee involvement is needed. No logins and no passwords.

Sell More - Faster

Shoppers scan and start their plan instantly. Ideal for high-traffic retail environments where speed is key.

Let Shoppers Help Themselves

Real-time self-service gives customers control and reduces friction in the checkout process.

Works at Every Location

Easy to deploy across stores or temporary setups without staff training or system changes.

No Tech? No problem.

Like Splitit's legacy plan, it requires no backend development, making it plug-and-play.

Display Details

Now that customers can start their own installment plans with a simple scan, it's time to put your QR code where it gets seen. The more visible it is, the more conversions you'll drive.

Here's how to make the most of it:

- Display it on your checkout iPads or POS screens
- Use table tents at the counter, employee desks, or waiting areas
- Add window clings near your entrance to catch attention before they walk in
- Include QR code on takeaway materials

Need branded materials or downloadable prints?

Let us know and we'll get you everything you need to start driving results with Splitit's new QR experience.

Comparison Chart

Feature/Aspect	Plan 1: Legacy	Plan 2: QR Code
Who Initiates	Merchant	Shopper
Setup Flow	Merchant enters the plan amount, Order Id, installment option and sends the payment link	Shopper scans QR code and enters their own payment details and preferences
Best For	Remote transactions, concierge services, and phone orders	In-store services, pop-ups, kiosks and minimal staff interaction
Staff Involvement	Requires the merchant to initiate each plan manually	Once QR is printed, no staff involvement is needed
Technical Integration	None required	None required
Shopper Experience	Waits for email/SMS → opens link → initiates plan	Scans QR code → instantly initiates plan
Speed & Convenience	Moderate	High-speed, real-time, self-service
